Steam School 2018

Rough & Tumble Steam School Kinzers, Pa.,
Saturday May 19th 2018 and Sunday May 20th 2018.

Steam School tuition is \$75, which includes school materials. Enrollment is limited to Rough & Tumble members. New members must join prior to school to operate equipment on the R&T grounds. The school is limited to the first 27 applicants, age 14 and over and school fills quickly. Applications are available and accepted beginning at the 2017 "Time of Harvest" show October 12th.

Emphasis is placed on safety, maintenance, operation, and the hands-on experience. Class time is limited to half of the first day, with remaining time dedicated to practical, hands-on operation, including cleaning, inspection, maintenance, and operation of numerous steam traction engines. Operating and conditions permitting, students also may operate 2 railroad engines (The Shay and Little Toot) as well as custom engines and a large variety of steam traction equipment. This gives students the widest experience available to operate steam equipment, unique to Rough and Tumble Engineers Historical Association in Pennsylvania. Please look at our web site of previous Steam Schools at <http://www.roughandtumble.org/> in our photo section.
